### Definitions

<b>Shuttle Flight</b>	A 'taxi' flight operated by MAF on which a customer books a seat
<b>Customer</b>	An organisation or an individual who makes a booking
<b>Funding Hour</b> <i>(used to calculate the cost of flying)</i>	Charter: 60 minutes of air time Shuttle: 60 minutes of air time divided between customers on the aircraft Joiner: 60 minutes of air time divided between customers on the aircraft
<b>Unique Passengers</b>	Passengers counted per flight not per leg (e.g. one passenger on two legs of the same flight is still one passenger)
<b>Unique Freight</b>	Freight counted per flight not per leg (e.g. one kilo of freight on two legs of the same flight is still one kilo of freight)
<b>Flight</b>	A flight is one or more flight legs flown with an aircraft. A flight is uniquely identified by its flight number, can cover more than one day, or only a part of a day.
<b>Flight Leg</b>	A flight leg is the part of a flight from one destination airstrip (take off) to the next destination airstrip (landing).
<b>Hours Flown</b>	Air time (wheels up to wheels down)
<b>Charter Flight</b>	The Customer 'hires' the complete aircraft
<b>Joiner Flight</b>	A customer joins an existing Charter flight booked by another organisation
